Favorite Accounts

1- All data related to favorite accounts are stored in database.

2– The following values are created and stored in the database:

- Favorite account name
- Favorite account IBAN
- Favorite account Bank

3- The bank is calculated from IBAN number:

- ES21 **0000** 0000 00 00000

Match code with Bank name in your application. A fictitious table to match codes and Bank name is included in this presentation.

Any Messaging Queue (Eg: Kafka, ActiveMQ, RabbitMQ) should be implemented to get the Bank name from the Bank code, with appropriate logic to demonstrate the Queue Flow.
